first ship for carrying oil..... 962
forest fire discloses oil in shale deposits.... 606
mud as plaster for oil wells..... 951
oil from fossil fish deposits..... 786
per cent of carbon in coal clue to oil deposits 647
refining cost cut by silicagel..... 370
sediment trap in oil burning supply pipe... 506
shooting fires 979
steel pipes make oil operation in Persia possible 732
Philadelphia—Sesquicentennial International Exposition—fair to celebrate triumph of invention 619
Phonograph
device for shifting horn from radio to phonograph 475
D X radio reception proved by phonograph records 993
hidden in doll..... 616
provides music for two rooms..... 491
runs movie projector..... 217
Phosphorescence
glow of sea bright enough for reading..... 266
some fungus and shellfish give off..... 278
Photography
aerial photos taken at night..... 203
brain workings of children studied with camera 181
camera ends drudgery in keeping records... 237
camera hung from tripod to take photos vertically 12
condensing lens for enlarger.....1035
copying drawing, prints, etc., by..... 343
curved printing surface for sharp focus in bromide enlargements 850
drying squeegee prints quickly..... 327
holder for washing photographic films..... 137
invisible light photographs in darkest night 1
making direct photographic positives..... 326
novel photographic collection 332
odd and grotesque photos.....1021
photos in cubist style..... 16
photos on umbrellas a fad..... 578
retouching fluid applied to negative with oilcan 143
soft focus attachment for enlarging..... 667
substitute for ferrotype sheets..... 842
take snapshots under water to study ships.. 757
triple spill in horse race tests speed of camera 209
use for old hypo.....1039
with electric lights without films or plates. 966
Physical Training
athletes roll inside wheel 770
Physiognomy—study character by sound from bumps on head 891
Picture Frame—for President Coolidge made of beads and silk 385
Pictures
artist paints on cobwebs instead of canvas. 418
war scenes molded in sand by cripple..... 285
Pilasters—building brick..... 159
Pile Driver—plants pine forest to support the rising skyscraper 274
Pins
fixture facilitates pin stamping..... 701
take place of needle and thread in dressing poultry 286
Pipes
big concrete pipe at Grenoble, France..... 359
compressor for split sleeves..... 878
connecting with a "dutchman"..... 689
cutting and bending small tubing.....1040
lock jointed furnace pipe..... 711
making tight joints..... 853
of steel conquer desert wastes..... 732
raising vertical piping..... 164
removing from racks 690
stopping leaky steampipes 342
telephone poles made from old water pipes. 162
Pipes (Tobacco)
amber not always of grade required..... 104

Pipes (Tobacco): (Continued)
automatic smoker breaks in pipes..... 985
breaking in a new pipe..... 508
pipe with trap for nicotine..... 294
spring holder for stem..... 543
Piston Ring—fitting auto 336
Plaster of Paris—how to toughen casts..... 865
Plating
flowers preserved by metal plating..... 113
nickelplating brass 152
nickelplating by friction..... 137
pump aids tumble.....1042
Platinum—deposits in Africa..... 784
Playground Apparatus—slide and teeter combined 290
Pliers—holding round objects with.....1045
Plow—and harrow combined..... 448
Plug
electric, tells when current is on..... 461
expansion for building 802
hollow fiber screw plug..... 564
Plumb—improvised carpenter's 871
Plumbing—emergency water supply for washroom 160
Plume—war gas used to protect against criminals 18
Poison—study odor of poisons to use on insects 818
Poles—telephone made from old water pipes... 162
Police
bullet proof shields for..... 288
gas drills for 744
of Boston improve marksmanship by aiming at human sized target..... 592
of London docks carry long crook and wear life saving jackets 546
policing the Arctic wilds..... 443
signal lights to control police in Memphis. 294
wear colored lights for night traffic..... 648
wear roller skates 599
Polish—wash furniture before polishing..... 332
Porch—hanging windowsash on..... 143
Porpoise—waves act as wireless to guide..... 709
Postal Service
how foreign mail is guided to proper address 72
letter stacker and canceler..... 778
U. S. has about 52,000 post offices..... 359
Posts
Planting fence posts securely..... 350
testing soundness of 1038
Potato
cutting seed 869
making potato hills pay..... 871
Poultry
automatically locked chicken coop..... 969
baffling chicken thieves 506
chicken feed hopper 1018
crankcase oil keeps mites away..... 867
durable nests made of concrete..... 515
fumigating incubator 664
hanging sash on poultry house..... 504
old shutter for chicken run..... 672
reading the incubator thermometer..... 522
shoeing roosters for fights..... 255
trussing pins take place of needle and thread 286
watering trough 503
Poverty—yearly cost of each pauper in U. S.... 58
Preservation—meat kept fresh fifty days..... 946
Printing
blind man devises printer for blind to operate 265
type setting machine for office use..... 394
Progress
America in a century and a half will be shown at Sesquicentennial 619
exhibit showing advance..... 89
inventions of recent years show most progress 402
of electricity in century..... 256
where men do the work of machines..... 807
Prohibition—battle of rum row..... 955
Projector—as sales aid..... 265
Propellers
making small 858
pitch of measured to avoid vibration..... 190
Protective Device—wire netting protects magazines 1040
Psychology
clenching fist sharpens mental activity..... 642
reaction to fear measured by pupils of eye. 817
Pueblo—built by Indians..... 600
Puget Sound—spanning narrows with electric cables 190, 191
Pulley—making patterns for small sheaves..... 524
Pump
aid tumble plating 1042
repairing 491
spiral pump lifts heavy oil for building roads 546
Punch—slate and asbestos cutter punches holes. 609
Purse—that sticks to pocket to prevent theft... 254
Push Cork—For auto radiator..... 240
Putty—can for painter.....1047

Q

Quilt Frame—props 847

R

Rabbits
cured of dizziness by repeated spinning.... 641
keeping from fruit trees..... 853
pest in New Zealand yields profit in fur.... 241
Rack—folding clothes 1028
Radiator—cap has hinged top..... 379
Radio
battle of ether waves..... 927
care in tuning 1008
few farms have 743
getting ready for winter D X..... 121
high school radio exchange..... 954
in children's hospital 994
international radio week tests..... 661
phonograph records prove D X reception... 993
program preserved on steel band..... 576
proof of pudding.....1056
secrecy for radio messages by use of dictaphones 616
static forecasts not possible..... 778
steam heat improves radio reception by keeping set dry 481
washer started by shadow of hand..... 179
wireless from moving trains..... 968
Radio Aerials
adjustable fittings for installation.....1002
glass towel rod good insulator..... 310
hidden mat type 833
mast clamps to ridgepole..... 482
masts at huge radio station at Rugby, England 109
mountain serves as radio mast for German station 977
novel, easily installed 481
pocket aerial in form of reel.....1003
using wall socket for aerial and ground leads 1010
Radio Antenna
like roller shade 119
underground improves reception 838
Radio Apparatus
adjustable resistance unit replaces amplifier rheostat 134
attachable peg for ground pipe..... 481
audio frequency transformer simplifies wiring 479
binocular coils 834
"canned" coils and condensers..... 837
carborundum detector self contained.....1009
colored caps indicate leads to set..... 480
colored wires identify leads..... 482
combination switch and voltmeter.....1008
combination tube tester and trouble shooter 485
combined gridleak and condenser..... 661
condenser's capacity not in number of plates alone 307
condenser inclosed in dust proof case.....1002
designs of switch plates harmonize with room 356
detector for interference..... 91
Ground clamp requires no screws..... 305
handy rack for spare tubes..... 133
horn extension made from old appliance cord 306
insulator and mounting for inside aerial... 125
jack controls both amplifier stages..... 479
log disk for radio receiver..... 975
making a wireless signal board for code practice 134
paper sleeves for spiderweb coil forms..... 301
picture molding clamp for indoor aerial..... 661
pilot light on panel saves tubes and batteries 309
portable lamp for radio receiver run by A battery 486
push pull adjustment features variable condenser 486
rheostat for critical filament control..... 832
shielded variable condenser 1003
solderless snap terminals for quick connections 1013
spacing dials from panel..... 125
spring clip terminal strip.....1002
switch locks prevents tampering..... 479
vernier dial has device for changing ratio.. 485
wiring harness for radio kits.....1003

"These Eveready Batteries are the correct size for your set. With average use they will last you a year or longer"

"You have been one of the many who use 'B' batteries that are too small in capacity for their receivers. That makes you buy 'B' batteries twice as often as necessary. Fit the right size Evereadys to your set and add a 'C' battery,* if you haven't one, and you'll get maximum service at minimum cost."

The life of your Eveready "B" Battery depends on its capacity in relation to your set and how much you listen in. We know, through investigation, that the average year-round use of a set is two hours a day. Taking that average we have proved over and over on sets of one to three tubes the No. 772 Eveready "B" Battery used with a "C" battery will last a year or longer. On sets of four and five tubes the larger heavy duty Eveready Batteries used with a "C" battery will last eight months or more.

The secret of "B" battery satisfaction and economy is—

With sets of from 1 to 3 tubes, use Eveready No. 772.

With sets of 4 or more tubes, use either of the heavy duty batteries No. 770 or the even longer lived Eveready Layerbilt No. 486.

We have prepared a new booklet, "Choosing and Using the Right Radio Batteries," which we will be glad to send you upon request. This booklet also tells about the proper battery equipment for use with the new power tubes.

Manufactured and guaranteed by
NATIONAL CARBON CO., INC.
New York San Francisco
Canadian National Carbon Co., Limited, Toronto, Ontario

*NOTE: In addition to the increased life which an Eveready "C" Battery gives to your "B" batteries, it will add a quality of reception unobtainable without it.

LEFT—*Eveready Layerbilt "B" Battery No. 486, 45 volts, for maximum economy on four, five or more tubes.*

RIGHT—*Eveready DryCell Radio "A" Battery, 1½ volts. The battery built especially for dry cell tubes.*
